

METALIS

GROUP

Our passion: solve your impossible!

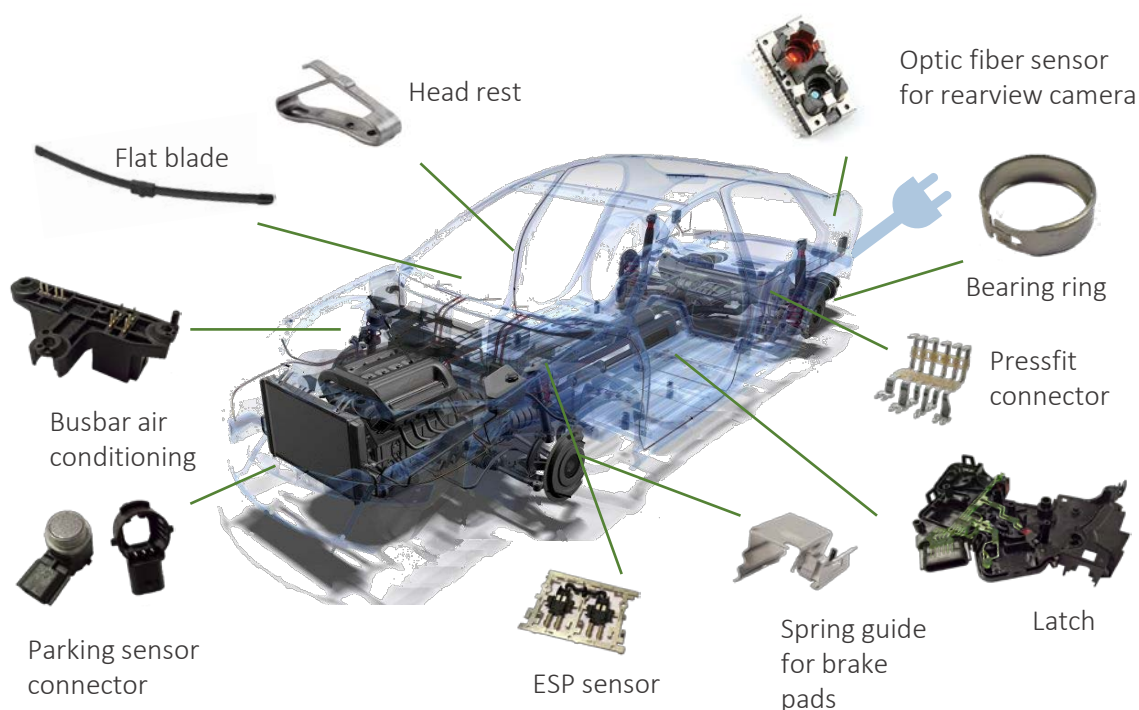

PRECISION STAMPING - FLAT SPRING
DEEP DRAWING - OVERMOLDING - ASSEMBLY

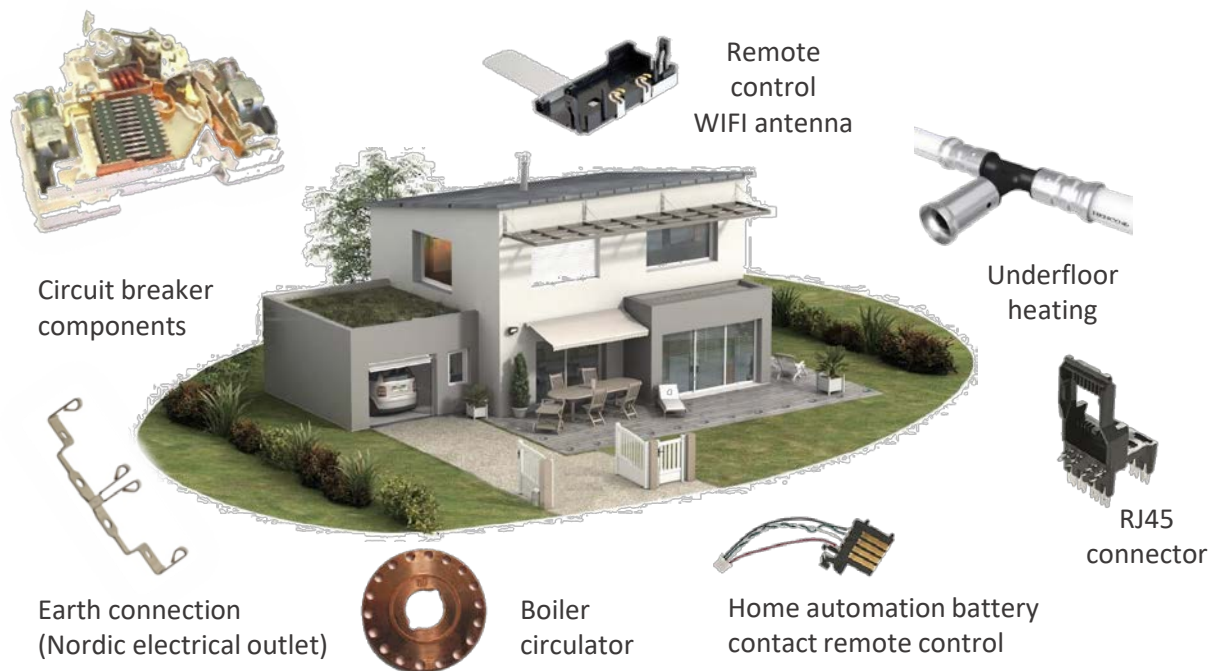

Automotive applications

Hybrid, electrical, autonomous vehicle

Construction applications

Domotic, high-tech connection

And other applications in electrical equipment, energy, aerospace...

Our winning combination:
co-development & process engineering

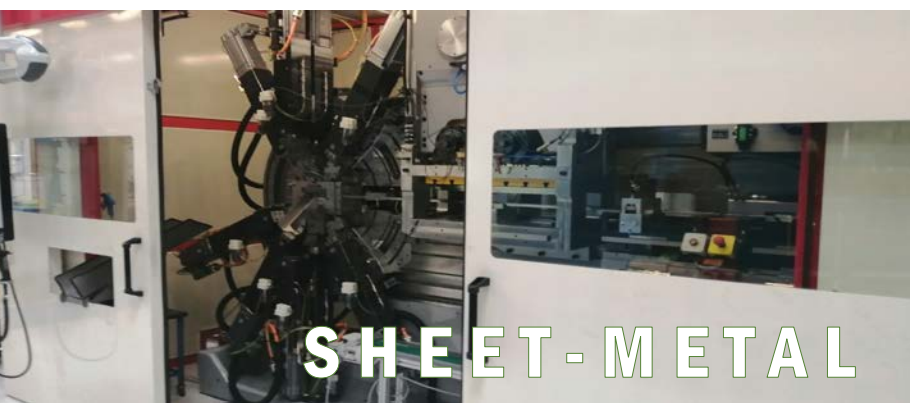

All technologies mastered in-house in each region:
Europe, Asia, North America

Technical expertise from a Group R&D Center
and 3 regional Technical Centers

PLASTIC

Reel-to-reel
overmolding
Stamped insert
molding
Customized
connectors

SHEET-METAL

Very high strength
material
Complex stamping
Cylindrical drawn
& rolled parts

ASSEMBLY

Assembly in the tool
Automated assembly
Packaging
100% checking
Particle cleanliness

METALIS

*We passionately create smart customized solutions
for your mission-critical products,
through innovative design-to-cost engineering,
best sheet-metal, plastic and assembly technologies...*

120 M€
8 plants
1,000 employees

...anywhere you need.
