Cultural visit - the Besançon Citadel

Listed as a **UNESCO World Heritage Site**, Vauban's 17th century masterpiece, the Besançon Citadel, is **one of the finest** in France.

The fortifications cover 11 hectares and lie more than 100 meters above the old town sitting in a loop of the River Doubs. The site is encircled by ramparts topped by walkways and punctuated with watchtowers and bartizans.

The walls are up to 20 meters high and 5 to 6 meters thick. The Citadel offers visitors spectacular views over the old town of Besançon and the surrounding hills.
